

Our Goals

Development and implementation of a user-friendly platform to handle all transactions related to crypto currencies. Alcedo meets the challenge to offer solutions to one of the biggest problems related to crypto currencies, i.e. widespread acceptance as a means of transacting payments. Here, our crypto ATM's at various Alcedo-Points will facilitate the exchange of Fiat- and crypto currencies, while our services will quickly expand to provide crypto-cash-machines and an app for mobile use as well. Of course, service advisors will be available for assistance at every Alcedo-Point. We will provide crypto currency access for retailers, which will lower transaction costs compared to conventional credit or debit cards. The Alcedo-Coin (ALCE) is an important part of our Eco-System, as it is a means for handling our service fees and rewards program.
